

20 Foot Container to be used as a Cantine-Room, Nederland

POLYUREA

Client	Van Oord, Rotterdam
Coating Contractor	PU Nederland, Werkendam
Projekt	Floorcoating Cantine Container
Surface	approx. 20 m ² floor coating
Construction	January 2012
VIP System	QuickPrime 1K-PU universal QuickSpray Industrial QuickCoat-Base Protect

Project Description

PU Nederland as new preferred applicator for VIP got the order to coat the floor in a 20 foot container that was going to be used as a canteen. To save time and money the customer choose to use QuickSpray Industrial (aromatic), a 100% pur Polyurea 2-K Coating based on Prepolymer and Polyamine technology with the matching top coat for colour fastness.

Work was carried out in 4 easy steps:

1. The existing floor was sanded and cleaned.
2. QuickPrime 1K-PU universal was used to increase adhesion for the Polyurea.
3. Using the hot spray technique the aromatic Polyurea QuickSpray was applied.
4. Immediately afterwards QuickCoat-Base Protect (aliphatic) was applied using an airless system to get a perfect colour stable floor.

These steps could be completed in a very short space of time. Through using the Polyurea System the job could be completed in less than a day.
