

Pick Up Liner VW Amarok through FIB Völker, Gotha

POLYUREA

Customer	Proud New Amarok Owner from Thuringia
Planning	
Applicator	FIB Völker, Gotha
Project	Pick Up Liner
Surface	4 m²
Completion	November 2012
VIP System	QuickSpray Industrial black

Project Description

The buyer of an Amarok wanted an optically pleasing, durable surface coating for the cargo box of his brandnew car. His local VIP approved applicator FIB Völker advised the use of QuickSpray Industrial black from VIP, a 100% Polyurea 2-K Coating based on polyamine technology, that is also in use OEM at the Volkswagen factory in Hannover.

The work was carried out in 4 easy steps:

1. The cargobox was masked utilising the VIP wire trim tape for an optically pleasing edge
2. For perfect adhesion the Quickprime universal 1K PU was applied in a thin layer on the painted surface.
3. After 20 minutes the Base Coat, Polyurea (aromatic) in black in 3mm thickness was applied by way of a Graco Reactor HXP-2 hot spray machine with final overspray finish.
4. Thanks to the wire trim tape the masking foil could be removed really speedily after a few minutes.

The Coatings makes the cargo box extremely durable and thanks to the overspray an optically pleasing surface was achieved, that really pleased the customer.
